

## 3dRudder foot controller for sale in Microsoft Stores and on Microsoft.com for use with the Xbox Adaptive Controller

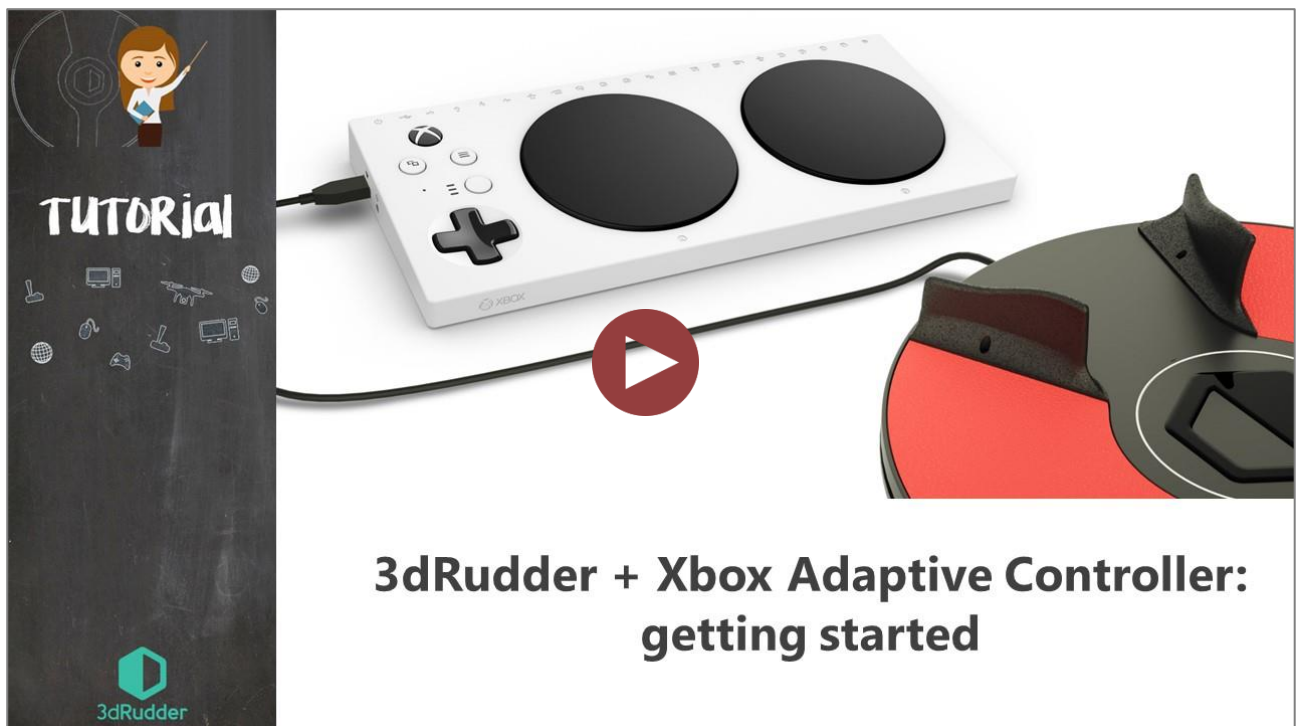

September 9, 2018 (NEW YORK, NY and AIX EN PROVENCE, FRANCE) – The 3dRudder foot controller is now for sale in the [Microsoft Stores](#) and on [Microsoft.com](#) to help make gaming more accessible to people with limited mobility.

Thanks to the Xbox Adaptive Controller and the 3dRudder foot controller, gamers suffering from upper body impairment are now able to play any of their favorite Xbox games with their feet.

### Just plug it in

Getting started with the 3dRudder couldn't be easier: all you have to do is plug the 3dRudder in the Xbox Adaptive Controller. The Adaptive Controller has 2 USB ports, one on each side. When you plug the 3dRudder in the right USB port, it takes the functionality of the right stick of the traditional gamepad -for camera control, gaze & aiming. Likewise, when you plug it in the left port it takes the functionality of the left stick -to move your character or vehicle, depending on in-game controls. Once your 3dRudder is plugged in, just put your feet on it and start playing.
